ICV PERFORMANCE INDICATORS

OUTCOME: Effective oversight of the Independent Custody Visiting Scheme to ensure the rights, entitlements, health and wellbeing of detained people are upheld in Gwent police custody.

Performance indicators tend to fall into 6 areas: Frequency of Visits; weekday coverage; weekend coverage; immediate access to custody; number of detainees visited and quality of care. With that in mind, we also record the detention of young people with and without an appointed appropriate adult; the provision for religious and cultural requirements; people detained for mental health reasons; and near misses.

Most figures will be collected monthly with reports to each meeting.

The collected figures will form an evidence base that recognises the independence of the ICVs and provides data to challenge force performance and practice in the Gwent force custody suites.

Performance Indicators - 2015	January	February	March	April	May	June	July	August	September	October	November	December
Number scheduled visits												
Number of actual visits during month												
Number of visits to Ystrad Mynach in month
