OFFICE OF THE POLICE AND CRIME COMMISSIONER FOR GWENT

Treasury Management Strategy 2019/20 to 2021/22

1 INTRODUCTION

- 1.1 Treasury Management is the management of cash flows, banking, money market and capital market transactions; the management of the associated risks, and the pursuit of the optimum performance or return consistent with those risks. The treasury management service is an important part of the overall financial management of the Police and Crime Commissioner's (Commissioner) affairs. The Commissioner is required to operate a balanced budget, which broadly means that cash raised during the year will meet cash expenditure. Part of the treasury management operation is to ensure that this cash flow is adequately planned, with cash being available when it is needed. Surplus monies are invested in low risk counterparties or instruments commensurate with the Commissioner's low risk appetite, providing adequate liquidity initially, before considering investment return. The second main function of the treasury management service is the funding of the Commissioner's capital plans. These capital plans provide a guide to the borrowing need of the Commissioner, essentially the longer term cash flow planning to ensure that the Commissioner can meet his capital spending obligations. management of longer term cash may involve arranging long or short term loans, or using longer term cash flow surpluses. On occasion, any debt previously drawn may be restructured to meet the Commissioner's risk or cost objectives.
- 1.2 The Commissioner's treasury activities are strictly regulated by statutory requirements and a professional code of practice, the CIPFA Code of Practice on Treasury Management. Under the Code, the Commissioner is required to receive and approve, as a minimum, three main reports each year, which incorporate a variety of policies, estimates and actuals.
- 1.3 The Prudential Code 2017 introduced a new requirement for local authorities (including Commissioners) to produce an annual capital strategy. It is for local authorities to decide whether to include their treasury management strategy and annual investment strategy as part of a capital strategy or to complete separately. In the first year of operation, the Commissioner has elected to complete a separate capital strategy which will be completed at the conclusion of the budget setting process in February 2019 and approved before the commencement of the 2019/20 financial year.
- 1.4 The adoption of a Treasury Management Strategy for 2019/20, prior to the start of the financial year, is the first of the three reporting requirements in

respect of that year. This will be followed in due course by a mid-year Treasury Management report and an Annual Treasury Report before 30th September 2019, providing a selection of actual prudential and treasury indicators.

1.5 The Treasury Management Strategy for 2019/20 covers two main areas:

Capital Issues

- (i) The capital plans and the prudential indicators; and
- (ii) The Minimum Revenue Provision (MRP) strategy.

Treasury Management Issues

- (i) Debt and investment projections;
- (ii) Limits on borrowing activity;
- (iii) The expected movement in interest rates;
- (iv) Borrowing and investment strategies;
- (v) Treasury performance indicators; and
- (vi) Specific limits on treasury activities.

2. CAPITAL PRUDENTIAL INDICATORS 2019/20 to 2021/22

- 2.1 The Local Government Act 2003 requires the Commissioner to adopt the CIPFA Prudential Code, which was updated in 2017, and produce prudential indicators. Each indicator either summarises the expected capital activity or introduces limits upon that activity, and reflects the outcome of the underlying capital appraisal systems. This document updates currently approved indicators and introduces new indicators for 2021/22.
- 2.2 Within this overall prudential framework there is an impact on the Commissioner's treasury management activity, as it will directly impact on borrowing or investment activity.

2.3 Capital Expenditure Plans

- 2.3.1 The capital expenditure plans are summarised below and this forms the first of the prudential indicators. A certain level of capital expenditure is grant supported by the Government; any decisions by the Commissioner to spend above this level will be considered unsupported capital expenditure.
- 2.3.2 This unsupported capital expenditure needs to have regard to:
 - (i) Service objectives (e.g. strategic planning);
 - (ii) Stewardship of assets (e.g. asset management planning);
 - (iii) Value for money (e.g. option appraisal);
 - (iv) Prudence and sustainability (e.g. implications for external borrowing and whole life costing);
 - (v) Affordability (e.g. implications for the council tax); and
 - (vi) Practicality (e.g. the achievability of longer term plans).

- 2.3.3 The revenue consequences of capital expenditure, particularly the supported capital expenditure, will need to be paid for from the Commissioner's own resources.
- 2.3.4 This capital expenditure can be paid for immediately (by applying capital resources such as capital receipts, capital grants, earmarked reserves (known as committed funds) or revenue resources), but if these resources are insufficient any residual capital expenditure will add to the Commissioner's borrowing need.
- 2.3.5 A key risk to the plans, are that the level of Government support has been estimated and could therefore be subject to change.
- 2.3.6 The Commissioner is asked to approve the following summary capital expenditure projections which is the first prudential indicator:

First Prudential Indicat	or - Estima	ites of Capi	tal Expend	iture	
	2018/19	2018/19	2019/20	2020/21	2021/22
	Original	Revised	Estimate	Estimate	Estimate
	£000's	£000's	£000's	£000's	£000's
Capital Expenditure	23,269	8,053	29,117	28,241	18,612
Financed by:					
Capital Receipts	0	655	0	0	0
Capital Grants and PIF Grants	449	449	449	449	449
Reserves	22,245	4,374	27,093	13,865	0
Revenue	575	2,575	1,575	2,575	2,575
Net Financing Need for the Year	0	0	0	11,352	15,588

2.3.7 The above financing need excludes other long term liabilities, such as Private Finance Initiative (PFI) and leasing arrangements which already include borrowing instruments. The table above identifies the financial requirements for the delivery of the Commissioner's Estate Strategy, which includes the investment in a new Headquarters and the transformation of operational policing presence into a 'Hub and Spoke' model, resulting in a borrowing need from 2020/21 onwards. Prior to 2020/21, the Capital Programme will continue to be funded from a combination of capital grant, revenue contributions to capital, capital receipts and committed funds.

2.4 The Commissioner's Borrowing Need (the Capital Financing Requirement)

2.4.1 The second prudential indicator is the Commissioner's Capital Financing Requirement (CFR) which is simply the total outstanding capital expenditure which has not yet been paid for from either revenue or capital resources. It is a measure of the Commissioner's underlying borrowing

- need. Any capital expenditure in the table in paragraph 2.3.6 above which has not immediately been paid for will increase the CFR.
- 2.4.2 The CFR includes any other long term liabilities (e.g. PFI schemes) brought onto the balance sheet. Whilst this increases the CFR, and therefore the Commissioner's borrowing requirement, these types of scheme include a borrowing facility and so the Commissioner is not required to borrow separately for this scheme. As at 31st March 2018 the Commissioner had £4.686m of such schemes within the CFR.
- 2.4.3 The Commissioner is asked to approve the CFR projections below:

Second Prudential Indica	tor - the Capi	tal Financing	Requiremen	t (CFR)	
	2018/19	2018/19	2019/20	2020/21	2021/22
	Original	Estimate	Estimate	Estimate	Estimate
	£000's	£000's	£000's	£000's	£000's
Opening CFR	4,684	4,686	4,511	0	10,898
Capital Spend	23,269	8,053	29,117	28,241	18,612
Movement in finance lease liability	(4,684)	(175)	(4,511)	0	0
Resources Used	(23,269)	(8,053)	(29,117)	(16,889)	(3,024)
MRP		0	0	(454)	(1,078)
Closing CFR	0	4,511	0	10,898	25,408

2.4.4 The CFR projections above assume the early repayment of the Commissioner's PFI in 2019/20. Although the Commissioner will not be required to make a MRP until 2020/21, he will still require a policy on this matter as per section 3 below.

3. MINIMUM REVENUE PROVISION POLICY

- 3.1 The Commissioner is required to recognise an element of outstanding capital borrowing each year through a revenue charge known as the MRP. The MRP is calculated to match the repayment of borrowing over the life of the assets, for which debt has been raised. It is also permissible to pay an additional amount known as a Voluntary Revenue Provision (VRP). Under Welsh Government (WG) Regulations the Commissioner has to approve an MRP Statement in advance of each year. The Commissioner is recommended to adopt the following MRP policy for 2019/20:
 - (i) For all capital expenditure incurred before 1st April 2008 and all supported capital expenditure incurred since that date or in the future, the MRP policy will be 4% of the CFR. This is consistent with the practice in place prior to the current regulations; and
 - (ii) For all unsupported borrowing since 1st April 2008 and in the future, the asset life method will be used, i.e., the amount borrowed will be divided by the life of the asset.

4. THE USE OF THE COMMISSIONER'S RESOURCES AND INVESTMENT POSITION

4.1 The application of resources (capital receipts, committed funds, etc.) will have an on-going impact on investments. Detailed below are estimates of the year-end balances for each resource and anticipated day to day cash flow balances.

Investmen	t Position - Ye	ear end Reso	ources		
	2018/19	2018/19	2019/20	2020/21	2021/22
	Original	Revised	Estimate	Estimate	Estimate
	£000's	£000's	£000's	£000's	£000's
Police Fund	9,000	4,000	4,000	4,000	4,000
Committed Funds	15,358	48,480	18,649	0	0
Provisions	1,585	1,594	1,594	1,594	1,594
Total Core Funds	25,943	54,074	24,243	5,594	5,594
Working Capital	6,773	6,429	6,429	6,429	6,429
Expected Investments	32,716	60,503	30,672	12,023	12,023

^{*}Working capital balances shown are estimated year end; these may be higher mid-year.

5. AFFORDABILITY PRUDENTIAL INDICATORS

- 5.1 The previous sections cover the overall capital and control of borrowing prudential indicators. Prudential indicators are also required to assess the affordability of the capital investment plans. The Commissioner is asked to approve the third and fourth prudential indicators, which assess affordability in terms of the impact of the capital investment plans on the Commissioner's overall finances.
- 5.2 The third prudential indicator is the ratio of net financing costs (financing income less finance interest expense) to net revenue stream. This indicator identifies the trend in the cost of capital (borrowing and other long term obligation costs net of investment income) against the net revenue stream.

Third Prudential Indicator - Ratio of Financing Costs to Net Revenue Stream								
	2018/19	2018/19	2019/20	2020/21	2021/22			
	Original	Revised	Estimate	Estimate	Estimate			
	%	%	%	%	%			
Ratio	-0.18%	-0.32%	-0.24%	0.52%	1.42%			

5.3 The estimates of financing costs include current commitments and the proposals in the budget report. The ratio turns positive in 2020/21 as interest expense will be payable on newly borrowed debt, at this point forecast interest expense will be greater than interest income.

5.4 The fourth prudential indicator identifies the increased revenue costs associated with the approved three year Capital Programme and expresses these in terms of the increase in Band D council tax. The assumptions are based on the budget, but will invariably include some estimates, such as the level of Government support, which is not published over a three year period.

Fourth Prudential Indicator - Increme	Fourth Prudential Indicator - Incremental Increase in Council Tax Precept						
	2019/20	2020/21	2021/22				
	Estimate	Estimate	Estimate				
	££££						
Ratio	0.81	4.05	8.54				

6. BORROWING

6.1 The capital expenditure plans are set out in Section 2.3.6. The treasury management function ensures that the cash is organised in accordance with the relevant professional codes, so that sufficient cash is available to meet the capital expenditure requirements. This will involve both the organisation of the cash flow and, where capital plans require, the organisation of approporiate borrowing facilities. The strategy covers the relevant treasury prudential indicators, the current and projected debt positions and the annual investment strategy.

6.2 Current portfolio position

The treasury portfolio position at 1st April 2018, with forward projections, are summarised below. The table shows the actual external debt (the treasury management operations), against the underlying capital borrowing need (the CFR), highlighting any over or under borrowing.

В	orrowing Po	osition			
	2018/19	2018/19	2019/20	2020/21	2021/22
	Original	Revised	Estimate	Estimate	Estimate
	£000's	£000's	£000's	£000's	£000's
External Debt					
Debt at 1st April		0	0	0	11,352
Expected Change in Debt		0	0	11,352	15,588
Other Long Term Liabilities (Finance					
Lease Liability - PFI) at 1st April	4,686	4,686	4,511	0	0
Expected Change in OLTL	(175)	(175)	(4,511)	0	0
Gross Debt at 31st March	4,511	4,511	0	11,352	26,940
Capital Financing Requirement at 31s	4,511	4,511	0	10,898	25,408
Under/(Over) Borrowing	0	0	0	(454)	(1,532)

6.3 The related impact of the above movements on the revenue budget is shown below:

Imp	Impact on Revenue Budgets								
2018/19 2018/19 2019/20 2020/21 2021									
	Original	Revised	Estimate	Estimate	Estimate				
£000's £000's £000's £000's £000									
Revenue Budget Heading									
Interest on Borrowing	0	0	0	352	835				
Investment Income	(224)	(399)	(301)	(141)	(79)				
Net Police Fund Borrowing Cost	(224)	(399)	(301)	211	756				

7. LIMITS ON BORROWING ACTIVITY

7.1 Within the prudential indicators there are a number of key indicators to ensure that the Commissioner operates activities within well-defined limits. For the first of these the Commissioner needs to ensure that gross debt does not, except in the short term, exceed the total of the CFR in the preceding year, plus the estimates of any additional CFR for 2019/20 and the following two financial years. This allows some flexibility for limited early borrowing for future years, but ensures that borrowing is not undertaken for revenue purposes. The following table is relevant for this indicator.

Limits on E	Borrowing A	Activity - Y	ear End Po	sition	
	2018/19	2018/19	2019/20	2020/21	2021/22
	Original	Revised	Estimate	Estimate	Estimate
	£000's	£000's	£000's	£000's	£000's
Gross Debt	0	0	0	11,352	26,940
Investments	(32,716)	(60,503)	(30,672)	(12,023)	(12,023)
Net Borrowing	(32,716)	(60,503)	(30,672)	(671)	14,917
Capital Financing Requirement	4,686	4,511	0	10,898	25,408
Gross Debt <= CFR	Yes	Yes	Yes	No	No

7.2 The next key indicator is the operational boundary. This is the limit beyond which external debt is not normally expected to exceed.

Operat	Operational Boundary for Debt at 1st April								
	2018/19	2018/19	2019/20	2020/21	2021/22				
	Original	Revised	Estimate	Estimate	Estimate				
	£000's	£000's	£000's	£000's	£000's				
Debt	0	0	0	11,352	26,940				
Other Long Term									
Liabilities	4,686	4,686	4,511	0	0				
Net Borrowing	4,686	4,686	4,511	11,352	26,940				

7.3 A further key prudential indicator representing a control on the overall level of borrowing is the Authorised Limit for External Debt. This is calculated on a 5% mark up on the operational boundary. This represents a limit beyond which external debt is prohibited and this limit needs to be set or revised by the Commissioner. It reflects the level of external debt which, while not desired, could be afforded in the short term, but is not sustainable in the longer term. This is the statutory limit determined under section 3 (1) of the Local Government Act 2003. The Government retains an option to control either the total plans of all Local Authorities and Commissioners, or those of a specific Authority or Commissioner, although no control has yet been exercised. The Commissioner is asked to approve the following Authorised Limit:

Αι	Authorised Limit for Debt at 1st April								
	2018/19	2018/19	2019/20	2020/21	2021/22				
	Original	Revised	Estimate	Estimate	Estimate				
	£000's	£000's	£000's	£000's	£000's				
Debt	0	0	0	11,920	28,287				
Other Long Term									
Liabilities	4,686	4,686	4,511	0	0				
Working Capital	0.770	0.400	0.400	0.400	0.400				
Requirement	6,773	6,429	6,429	6,429	6,429				
Authorised Limit	11,459	11,115	10,940	18,349	34,716				

7.4 Risks associated with any advance borrowing activity will be subject to appraisal in advance and subsequent reporting through the mid-year or annual reporting mechanism.

8. PROSPECTS FOR INTEREST RATES

8.1 The Commissioner uses Link Asset Services (previously known as Capita Asset Services) as treasury management advisors and part of their service is to provide a view on the prospects for interest rates and economic

growth. The following table gives the Link Asset Services central view on the prospects for interest rates.

	Dec-18	Mar-19	Jun-19	Sep-19	Dec-19	Mar-20	Jun-20	Sep-20	Dec-20	Mar-21	Jun-21	Sep-21	Dec-21	Mar-22
Bank Rate View	0.75%	0.75%	1.00%	1.00%	1.00%	1.00%	1.25%	1.25%	1.50%	1.50%	1.50%	1.75%	1.75%	2.00%
3 Month LIBID	0.80%	0.80%	0.90%	1.10%	1.10%	1.20%	1.40%	1.50%	1.60%	1.60%	1.70%	1.80%	1.90%	2.00%
6 Month LIBID	0.90%	0.90%	1.00%	1.20%	1.20%	1.30%	1.50%	1.60%	1.70%	1.70%	1.80%	1.90%	2.00%	2.10%
12 Month LIBID	1.00%	1.00%	1.10%	1.30%	1.30%	1.40%	1.60%	1.70%	1.80%	1.80%	1.90%	2.00%	2.10%	2.20%
5yr PWLB Rate	2.00%	2.10%	2.20%	2.20%	2.30%	2.30%	2.40%	2.50%	2.50%	2.60%	2.60%	2.70%	2.70%	2.80%
10yr PWLB Rate	2.50%	2.50%	2.60%	2.70%	2.70%	2.80%	2.90%	2.90%	3.00%	3.10%	3.10%	3.20%	3.20%	3.20%
25yr PWLB Rate	2.90%	3.00%	3.00%	3.10%	3.20%	3.20%	3.30%	3.40%	3.50%	3.50%	3.60%	3.60%	3.60%	3.70%
50yr PWLB Rate	2.70%	2.80%	2.80%	2.90%	3.00%	3.00%	3.10%	3.20%	3.30%	3.30%	3.40%	3.40%	3.40%	3.50%

- 8.2 The Monetary Policy Committee (MPC) delivered a 0.25% increase in Bank Rate at its meeting on 2nd August 2018 from 0.5% to 0.75%. However, the MPC emphasised again, that future Bank Rate increases would be gradual and it is unlikely that the MPC will increase the bank rate in February 2019. The Link Asset Services forecast as above, includes increases in the Bank Rate of 0.25% in June 2019, June 2020 and Dec 2020 to reach 1.5%. The gradual increase of the interest rates is dependent on a reasonaly ordered Brexit.
- 8.3 Economic and interest rate forecasting remains difficult with so many external influences weighing on the UK. The above forecasts (and MPC decisions) will be liable to further amendment depending on how economic data and developments in financial markets transpire over the next year. Geopolitical developments, especially in the European Union (EU), could also have a major impact. Forecasts for average investment earnings beyond the three-year time horizon will be heavily dependent on economic and political developments.
- 8.4 The overall longer run trend is for gilt yields and Public Works Loan Board (PWLB) rates to rise, albeit gently. It has long been expected, that at some point, there would be a more protracted move from bonds to equities after a historic long-term trend, over about the last 25 years of falling bond yields. The action of central banks since the financial crash of 2008, in implementing substantial Quantitative Easing, added further impetus to this downward trend in bond yields and rising bond prices. The sharp rise in bond yields since the US Presidential election in November 2016 has called into question whether the previous trend may go into reverse, especially with yields rising further as a result of a big increase in the US Government deficit aimed at stimulating economic growth, but has created concerns around significant increases in inflation. The Federal Reserve has tried to combat its perception of rising inflation by repeatedly increasing the Federal rate to reach 2.00% - 2.25% in September 2018 and has continued it's policy of not fully reinvesting proceeds from bonds

that it holds when they mature. This caused 10 year bond treasury yields to rise above 3.2% during October 2018 and has also seen investors causing a sharp fall in equity prices as they sold out of holding riskier assets.

- 8.5 The overall balance of risks to economic recovery in the UK is probably to the downside, particularly with the current level of uncertainty over the final terms of Brexit. From a global perspective growth has been doing reasonably well but the expected downturn in the US and the weakening economic activity in China is likely to weaken world growth.
- 8.6 Downside risks to current forecasts for UK gilt yields and PWLB rates currently include:
 - Bank of England monetary policy takes action too quickly, or too far over the next three years to raise the Bank Rate and causes UK economic growth and increases in inflation, to be weaker than we currently anticipate;
 - Geopolitical risks, especially North Korea, but also in Europe and the Middle East, which could lead to increasing safe haven flows;
 - A resurgence of the Eurozone sovereign debt crisis, possibly Italy, due to its high level of government debt, low rate of economic growth and vulnerable banking system. The EU has rejected the proposed Italian budget and has demanded cuts in government spending which the Italian Government has refused. Rating agencies have downgraded Italian debt to one notch above junk level;
 - If there is a disorderly Brexit which causes significant economic disruption and a major downturn in the growth rate;
 - Weak capitalisation of some European banks. Italian banks are particularly vulnerable;
 - German minority government In the German general election of September 2017, Angela Merkel's CDU party was left in a vulnerable minority position dependent on the fractious support of the SPD party, as a result of the rise in popularity of the anti-immigration AfD party. Then in October 2018, the results of the Bavarian and Hesse state elections radically undermined the SPD party and showed a sharp fall in support for the CDU. As a result, the SPD is reviewing whether it can continue to support a coalition that is so damaging to its electoral popularity. After the result of the Hesse state election, Angela Merkel announced that she would not stand for re-election as CDU party leader at her party's convention in December 2018. However, this makes little practical difference as she is still expected to aim to continue for now as the Chancellor. Furthermore, there are five more state elections coming up in 2019 and EU parliamentary elections in May/June; these could result in a further loss of electoral support for both the CDU and SPD which could also undermine her leadership;

- Further increases in interest rates in the US could spark a sudden flight of investment funds from more risky assets e.g. shares, into bonds yielding a much improved yield;
- Austria, the Czech Republic and Hungary now form a strongly antiimmigration bloc within the EU while Italy, this year, has also elected a strongly anti-immigration government. Elections to the EU parliament are due in May/June 2019;
- Continuing protectionism under President Trump; and
- There are concerns around the level of US corporate debt which has swollen massively during the period of low borrowing rates in order to finance mergers and acquisitions. This has resulted in the debt of many large corporations being downgraded to a BBB credit rating, close to junk status.
- 8.7 The potential for upside risks to current forecasts for UK gilt yields and PWLB rates, especially for longer term PWLB rates include:
 - The Bank of England is too slow in its pace and strength of increases in Bank Rate and therefore, allows inflation pressures to build up too strongly within the UK economy, which then necessitates a later rapid series of increases in Bank Rate faster than we currently expect. UK inflation returning to sustained significantly higher levels causing an increase in the inflation premium inherent to gilt yields;
 - If the UK faces a general election in the next 12 months, this could result in a potential loosening monetary policy and therefore medium to long dated gilt yields could rise on the expectation of a weak pound and there would be concerns around inflation picking up;
 - Brexit if both sides were to agree a compromise that removed all threats of economic and polition disruption; and
 - The Federal Reserve causing a sudden shock in financial markets through misjudging the pace and strength of increases in its Federal Funds Rate and in the pace and strength of reversal of Quantitative Easing, which then leads to a fundamental reassessment by investors of the relative risks of holding bonds, as opposed to equities. This could lead to a major flight from bonds to equities and a sharp increase in bond yields in the US, which could then spill over into impacting bond yields around the world.

9. BORROWING STRATEGY 2019/20 - 2021/22

9.1 The uncertainty over future interest rates increases the risks associated with treasury activity. Investment returns are likely to remain low during 2019/20 but to be on a gently rising trend over the next few years. As a result, the Commissioner will continue a cautious approach to treasury strategy.

- 9.2 The Chief Finance Officer (CFO) (Section 151 Officer), under delegated powers, will take the most appropriate form of borrowing depending on the prevailing interest rates at the time, taking into account the risks shown in the forecast above. It is likely that shorter term fixed rates may provide lower cost opportunities in the short/medium term.
- 9.3 The Commissioner is currently maintaining a neutral-borrowing position. This means that the capital borrowing need (the CFR), has been fully matched with loan debt. For 2019/20 this debt represents the finance lease liability linked to the PFI asset. The Commissioner plans to settle this liability in 2019/20 and the costs of such a strategy have been included in the Capital Programme.
- 9.4 The Commissioner will not have any further CFR in 2019/20 as committed funds will be utilised to fund the Capital Programme.
- 9.5 External debt will only be sought once the committed funds earmarked for capital expenditure have been utilised. The Commissioner anticipates that external borrowing will be required from 2020/21. The over-borrowing position is a direct impact of the MRP charge reducing the CFR.

10. INVESTMENT STRATEGY 2019/20 - 2021/22

- 10.1 **Key Objectives** The Commissioner's primary investment strategy objectives are, firstly, safeguarding the re-payment of the principal and interest of his investments on time and, secondly, ensuring adequate liquidity. The investment return is an important third objective, but not as important as the first two objectives. Following the economic background outlined above, the current investment climate has one over-riding risk consideration; that of counterparty security risk.
- 10.2 **Risk Benchmarking** A development in the revised 2011 Codes and the Welsh Government Investment Guidance is the consideration and approval of security and liquidity benchmarks. Yield benchmarks are currently widely used to assess investment performance. Discrete security and liquidity benchmarks are new requirements in the revised Code, although the application of these is more subjective in nature.
- 10.3 These benchmarks are simple guides (not limits) and so may be breached from time to time, depending on movements in interest rates and counterparty criteria. The purpose of the benchmark is that officers will monitor the current and trend position and amend the operational strategy to manage risk as conditions change. Any breach of the benchmarks will be reported, with supporting reasons in the Mid-Year or Annual Report.
- 10.4 **Security** The Commissioner's maximum security risk benchmark for the current portfolio, when compared to these historic default tables, is:

- (i) 0.009% historic risk of default when compared to the whole portfolio.
- 10.5 **Liquidity** In respect of this area the Commissioner seeks to maintain:
 - (i) Liquid short term deposits of at least £2m available with a week's notice; and
 - (ii) Weighted Average Life of investments with banks between 3 and 12 months; and
 - (iii) Note that no overdraft facility is held at Lloyds bank.
- 10.6 **Yield** Local measures of yield benchmarks are:
 - (i) Investments Internal returns compared to the 7 day London Interbank Bid Rate (LIBID).
- 10.7 The security benchmark for each individual year is:

	1 year	2 years	3 years	4 years	5 years
Maximum	0.009%	Not	Not	Not	Not
		applicable	applicable	Applicable	Applicable

Note: This benchmark is an average risk of default measure, and would not constitute an expectation of loss against a particular investment.

- 10.8 Investment Counterparty Selection Criteria The primary principle governing the Commissioner's investment criteria is the security of his investments, although the yield or return on the investment is also a key consideration. The Commissioner will not use non-specified investments i.e. investments exceeding 1 year 364 days. The Commissioner will ensure:
 - (i) A policy covering types of investment, criteria for choosing investment counterparties with adequate security, and monitoring their security. This is set out in the Specified Investment (investments not exceeding 1 year 364 days) sections below; and
 - (ii) Sufficient liquidity in investments. For this purpose procedures will be set out for determining the maximum periods for which funds may prudently be committed. These procedures also apply to the prudential indicators covering the maximum principal sums invested.
- 10.9 The Assistant Chief Officer Resources will maintain a counterparty list in compliance with the following criteria. This criteria is separate from that which chooses Specified and Non-Specified Investments, as it provides an overall pool of counterparties considered high quality that the Commissioner may use rather than defining what his investments are.
- 10.10 The rating criteria uses the lowest common denominator method of selecting counterparties and applying limits. This means that the

application of the Commissioner's minimum criteria will apply to the lowest available rating for any institution. For instance if an institution is rated by two agencies, one meets the Commissioner's criteria, the other does not, the institution will fall outside the lending criteria. This is in compliance with a CIPFA Treasury Management Panel recommendation in March 2009 and the CIPFA Treasury Management Code of Practice.

- 10.11 Credit rating information is supplied by the Commissioner's treasury consultants on all active counterparties that comply with the criteria below. Any counterparty failing to meet the criteria would be omitted from the counterparty (dealing) list. Any rating changes, rating watches (notification of a likely change), rating outlooks (notification of a possible longer term change) are provided to officers almost immediately after they occur and this information is considered before dealing. For instance a negative rating watch applying to a counterparty at the minimum of the Commissioner's criteria will be suspended from use, with all others being reviewed in light of market conditions.
- 10.12 The Commissioner only uses the following high credit quality counterparties:
 - (i) UK banks and banks domiciled in a country other than the UK which has a minimum Sovereign long term rating of AAA, which have at least the following Fitch, Moody's and Standard and Poor's ratings (where rated):
 - Short Term F1/A1/P1;
 - Long Term A;
 - (ii) Part nationalised UK banks Lloyds Banking Group and Royal Bank of Scotland. These banks can be included if they continue to be part nationalised or they meet the ratings in Banks above;
 - (iii) Building Societies which:
 - Meet the ratings for banks outlined above; or
 - Have assets in excess of £1bn;
 - (iv) Money Market Funds AAA;
 - (v) UK Government (including gilts and the DMADF (see below));
 - (vi) Local Authorities; and
 - (vii) Supranational institutions.
- 10.13 Due care will be taken to consider the country, group and sector exposure of the Commissioner's investments. In part, the country selection will be chosen by the credit rating of the Sovereign state. In addition:
 - (i) No more than £3m will be placed with any single non-UK country at any time;
 - (ii) Limits in place above will apply to Group companies; and
 - (iii) Sector limits will be monitored regularly for appropriateness.

- 10.14 Additional requirements under the Code of Practice now require the Commissioner to supplement credit rating information. Whilst the above criteria relies primarily on the application of credit ratings to provide a pool of appropriate counterparties for officers to use, additional operational market information will be applied before making any specific investment decision from the agreed pool of counterparties. This additional market information (for example Credit Default Swaps, negative rating watches/outlooks) will be applied to compare the relative security of differing investment counterparties.
- 10.15 The time and monetary limits for institutions on the Commissioner's Counterparty List are as follows:

	Fitch (or equivalent)	Money Limit	Time Limit
LUC De el e (O e e e)	• •	040	005 1
UK Banks (Groups)	P1/F1/A1	£10m	<365days
Non UK Banks (Groups)	P1/F1/A1	£5m	<365days
Building Societies	P1/F1/A1	£5m	<365days
Money Market Funds	AAA	£5m	<365days
Local Authorities		£15m	<2 years
UK DMO	-	None	<365days
Guaranteed Organisations	-	£3m*	<365days

^{*}Guaranteed institutions will need to be restricted to the terms of the guarantee.

- 10.16 Due to an increasing demand from Local Authorities for loans it is recommended that the money limit is increased from £10m to £15m per Local Authority.
- 10.17 In the normal course of the Commissioner's cash flow operations it is expected that only Specified Investments will be utilised.
- 10.18 The criteria for choosing counterparties set out above provide a sound approach to investment in 'normal' market circumstances. However, under exceptional market conditions the CFO may, after consulting the Commissioner, temporarily restrict further investment activity to those counterparties considered of higher credit quality than the minimum criteria set out for approval. These restrictions will remain in place until the banking system returns to 'normal' conditions. Similarly the time periods for investments may be restricted. Examples of these restrictions would be the greater use of the Debt Management Account Deposit Facility (DMADF a Government body which accepts local authority deposits), Money Market Funds, guaranteed deposit facilities and strongly rated institutions offered support by the UK

Government. The credit criteria have been amended to reflect these facilities.

10.19 Additionally, the Commissioner reserves the right to continue to hold an investment if the institutions credit rating is down-graded during the investment period if he is satisfied that the risks associated with the institution and investment are able to be managed and/or mitigated appropriately.

10.20 Banking Arrangements

The Commissioner's banker is Lloyds Bank, having switched from the Cooperative Bank during 2014/15. The contract with Lloyds expires on 30th July 2019; the retendering of which, is currently being progressed in conjunction with the Procurement Department.

11. SENSITIVITY TO INTEREST RATE MOVEMENTS

11.1 The Commissioner is required to disclose in the accounts the impact of risks on treasury management activity. Whilst most of the risks facing the treasury management service are addressed elsewhere in this report (credit risk, liquidity risk, market risk, maturity profile risk), the impact of interest rate risk is discussed but not quantified. The table below highlights the estimated impact of a 1% increase/decrease in all interest rates to the estimated treasury management costs/income for next year. That element of the debt and investment portfolios which are of a longer term, fixed interest rate nature will not be affected by interest rate changes.

Sensitivity to Interest Rate Movements				
	2019/20	2019/20		
	Estimated	Estimated		
	+1%	-1%		
	£000's	£000's		
Interest on Borrowing	0	0		
Investment Income	424	(280)		

12. TREASURY MANAGEMENT - LIMITS ON ACTIVITY

12.1 There are four further treasury activity limits, which were previously prudential indicators. The purpose of these is to contain the activity of the treasury function within certain limits, thereby managing risk and reducing the impact of an adverse movement in interest rates. The Commissioner approves these limits.

	2019/20	2020/21	2021/22		
Interest rate Exposures					
	Upper	Upper	Upper		
Limits on fixed interest					
rates based on net debt	100%	100%	100%		
Limits on variable interest					
rates based on net debt	35%	35%	35%		
Maturity Structure of fixed interest rate borrowing 2019/20					
		Lower	Upper		
Under 12 months		0%	20%		
12 months to 2 years		0%	20%		
2 years to 5 years		0%	20%		
5 years to 10 years		0%	20%		
10 years and above		20%	90%		
Maximum principal sums invested > 364 days					
Principal sums invested >	£m	£m	£m		
364 days	15	15	15		

13. PERFORMANCE INDICATORS

- 13.1 The Code of Practice on Treasury Management requires the Commissioner to set performance indicators to assess the adequacy of the treasury function over the year. These are distinct historic indicators, as opposed to the prudential indicators, which are predominantly forward looking. Performance indicators to be used for the treasury function are:
 - (i) Debt Borrowing Average rate of borrowing for the year compared to PWLB rates; and
 - (ii) Investments Internal returns compared with the 7 day LIBID rate.

The results of these indicators will be reported in the Treasury Annual Report.

14. TREASURY MANAGEMENT ADVISERS

- 14.1 The Commissioner uses Link Asset Services as treasury management advisors. The company provides a range of services which include:
 - (i) Technical support on treasury matters, capital finance issues and code compliance;
 - (ii) Economic and interest rate analysis;
 - (iii) Debt services which includes advice on the timing of borrowing:
 - (iv) Debt rescheduling advice surrounding the existing portfolio;
 - (v) Generic investment advice on interest rates, timing and investment instruments: and
 - (vi) Credit ratings/market information service, comprising the three main credit rating agencies.

14.2 Whilst the advisers provide support to the internal treasury function, under current market rules and the CIPFA Code of Practice the final decision on treasury matters remains with the Commissioner.

15. TREASURY MANAGEMENT TRAINING

15.1 Officer training needs are assessed on appointment, as part of the Personal Development Review (PDR) process and when legislation changes are announced. Officers attend seminars arranged by Link Asset Services and other organisations. Staff within the Office of the Police and Crime Commissioner and Joint Audit Committee members also receive periodic Treasury Management training.
